1.Zoho Creator AI Application Landing Page

Zoho Creator is a sleek, AI-powered platform that helps businesses build applications quickly and easily. Its homepage shows how enterprises can use AI and low-code tools to turn ideas into working apps in seconds. A simple prompt box invites users to describe what they need, such as an app to manage vehicle service and repair requests for a garage.

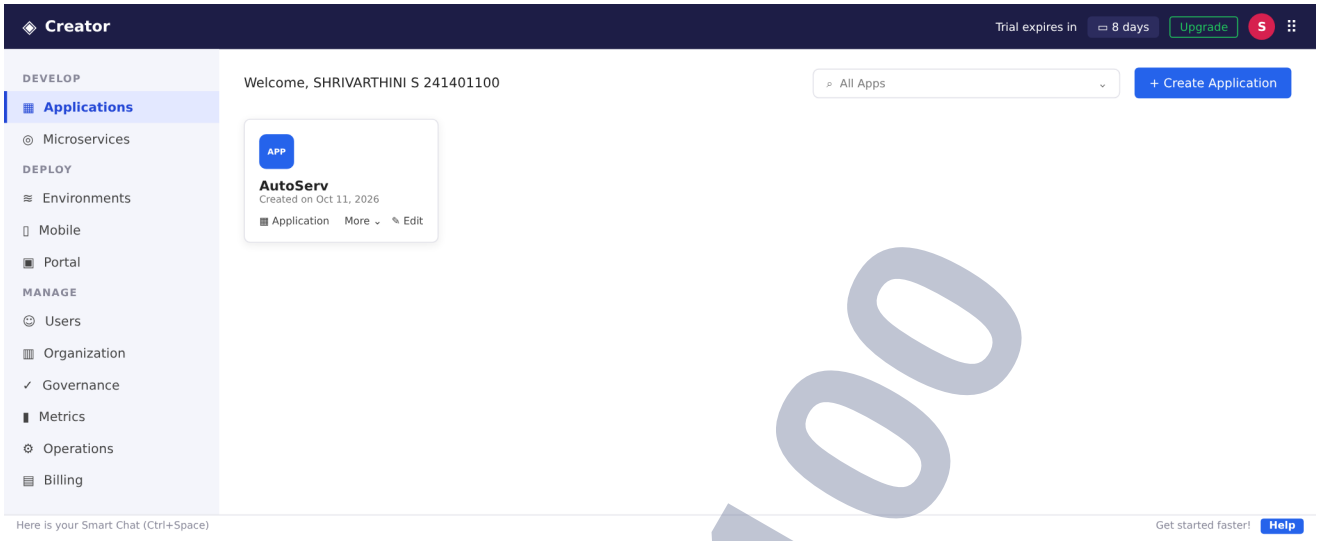

2.Zoho Creator Sign In/Authentication Pool

The sign-in page offers several ways to log in, including Google, Facebook, LinkedIn, Apple and Zoho itself. It also promotes passwordless sign-in through OneAuth, which keeps access to the vehicle service workspace secure and effortless. The design is clean and easy to follow.

3.Zoho Creator User Dashboard

Once inside, the dashboard greets Shrivarthini and shows the workspace with an app called AutoServ, built for vehicle service and repair request management. The sidebar organizes everything under Develop, Deploy and Manage, which keeps navigation simple.

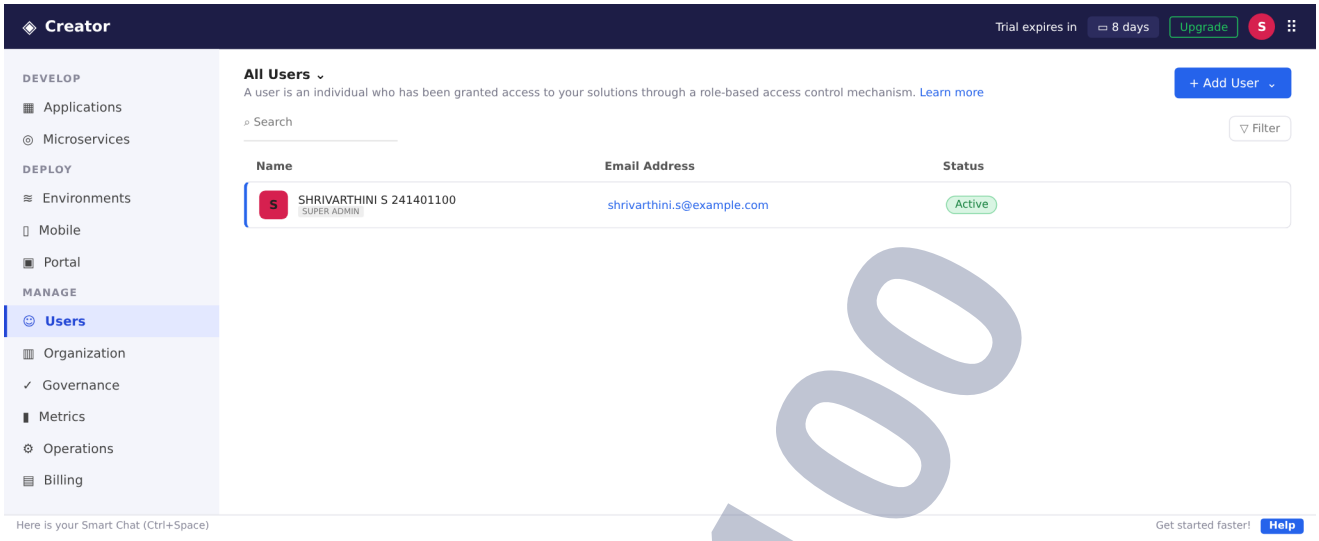

4.Multistage Environment Dashboard

The “Environments” page shows how the AutoServ app can be deployed in stages, first testing and then production. This lets new service workflows be tried safely before they go live for customers and mechanics.

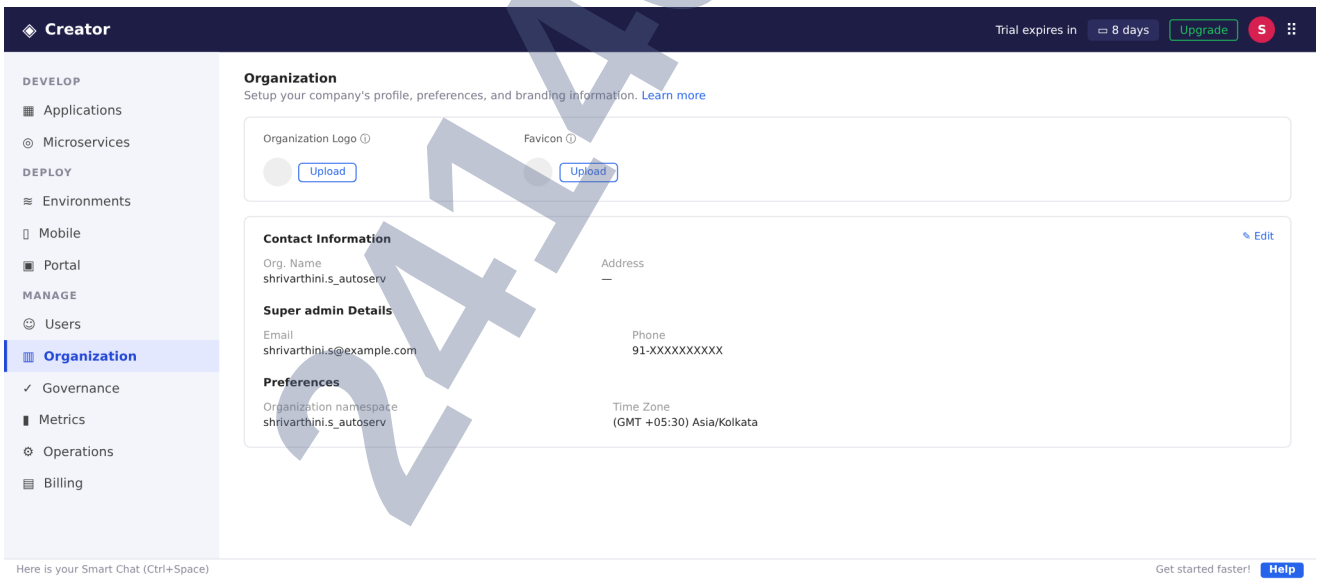

241401100

5.User Management and Role Based Access

The “Users” section lists everyone with access to the platform. Shrivarthini appears as the Super Admin with an active status. Further users such as service advisors, mechanics and customers can be added and given role-based access, which keeps the garage team organized and secure.

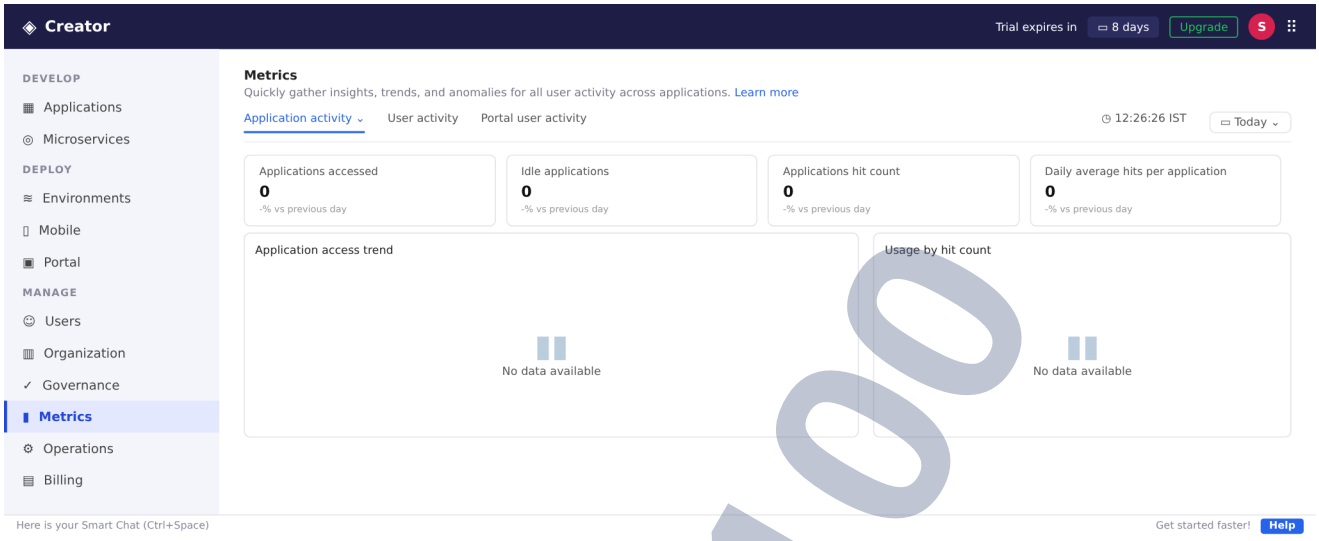

6.Organization Settings and Profile Setup

In the “Organization” tab, users can upload a logo, set contact details and define preferences such as the time zone. This gives the workspace a professional identity, for example the garage or service center name, while keeping administrative details tidy.

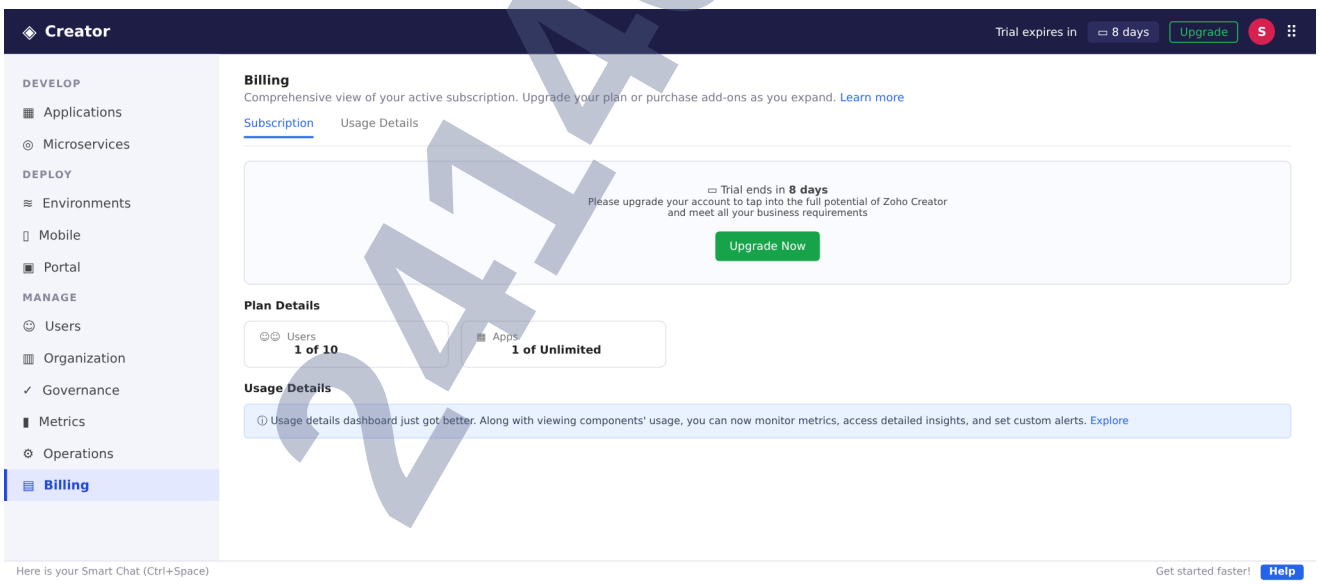

241401100

7.Metrics and Application Analysis Dashboard

The “Metrics” page provides insights into application activity. No data is available yet, since the app has just been created. It is designed to track usage trends and performance, so charts will fill in once service requests start flowing.

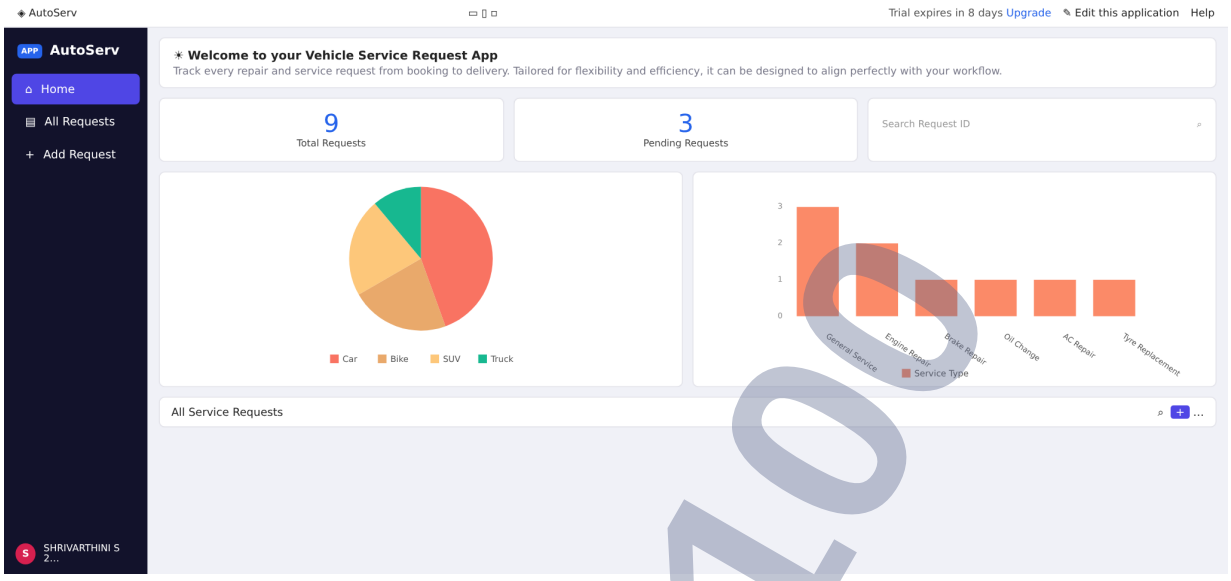

8.Billing and Subscription Management

The “Billing” page shows the subscription details and trial status, reminds users when the trial ends and offers an upgrade option. It also displays plan limits and usage, such as users and apps, so the account stays transparent and easy to manage.

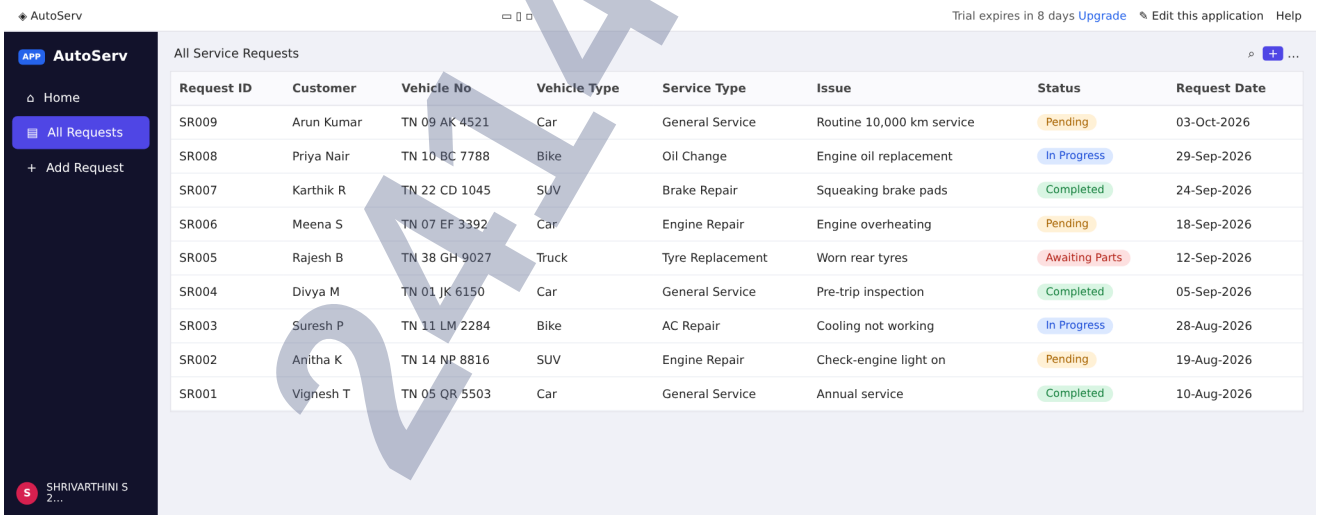

241401100

9.Live Custom Application Home Dashboard

Inside the AutoServ app, the home dashboard summarizes service requests with charts and tables. It shows total and pending requests, a breakdown by vehicle type and the number of requests per service type. The layout helps service advisors track repair work efficiently.

10.Detailed Data Report View

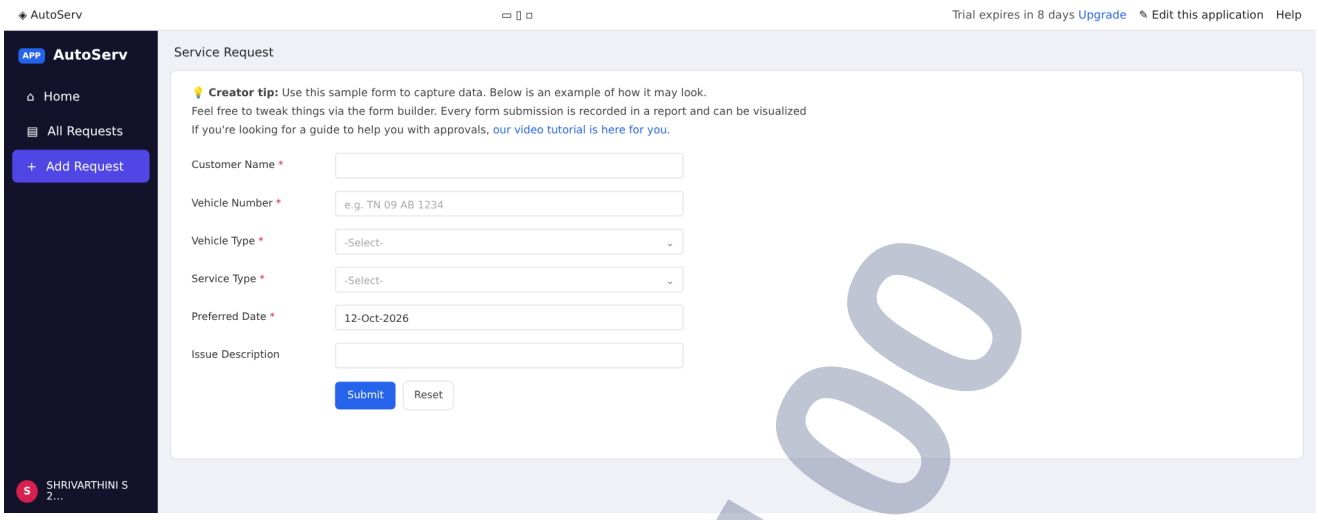

Request ID	Customer	Vehicle No	Vehicle Type	Service Type	Issue	Status	Request Date
SR009	Arun Kumar	TN 09 AK 4521	Car	General Service	Routine 10,000 km service	Pending	03-Oct-2026
SR008	Priya Nair	TN 10 BC 7788	Bike	Oil Change	Engine oil replacement	In Progress	29-Sep-2026
SR007	Karthik R	TN 22 CD 1045	SUV	Brake Repair	Squeaking brake pads	Completed	24-Sep-2026
SR006	Meena S	TN 07 EF 3392	Car	Engine Repair	Engine overheating	Pending	18-Sep-2026
SR005	Rajesh B	TN 38 GH 9027	Truck	Tyre Replacement	Worn rear tyres	Awaiting Parts	12-Sep-2026
SR004	Divya M	TN 01 JK 6150	Car	General Service	Pre-trip inspection	Completed	05-Sep-2026
SR003	Suresh P	TN 11 LM 2284	Bike	AC Repair	Cooling not working	In Progress	28-Aug-2026
SR002	Anitha K	TN 14 NP 8816	SUV	Engine Repair	Check-engine light on	Pending	19-Aug-2026
SR001	Vignesh T	TN 05 QR 5503	Car	General Service	Annual service	Completed	10-Aug-2026

The “All Service Requests” page lists detailed entries with the request ID, customer, vehicle number, vehicle type, service type, issue, status and request date. It is straightforward and well organized, so requests can be reviewed and managed at a glance.

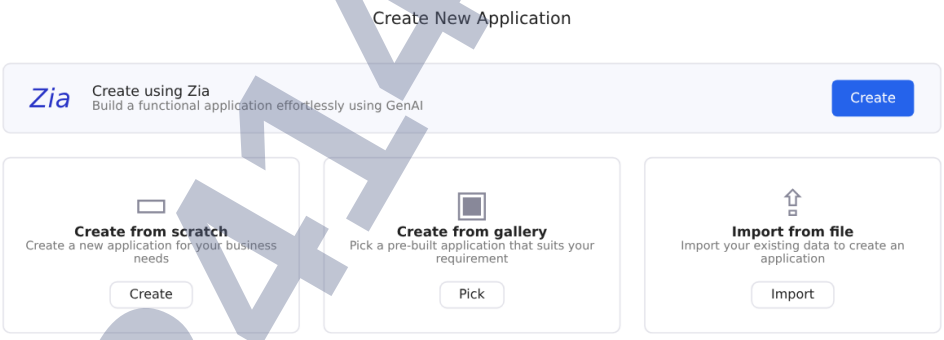

2414010

11.Adding Service Request

The “Add Request” form lets customers or advisors submit a new vehicle service or repair request. It has fields for customer name, vehicle number, vehicle type, service type, preferred date and a description of the issue. Helpful tips and a link to a video tutorial make it beginner-friendly.

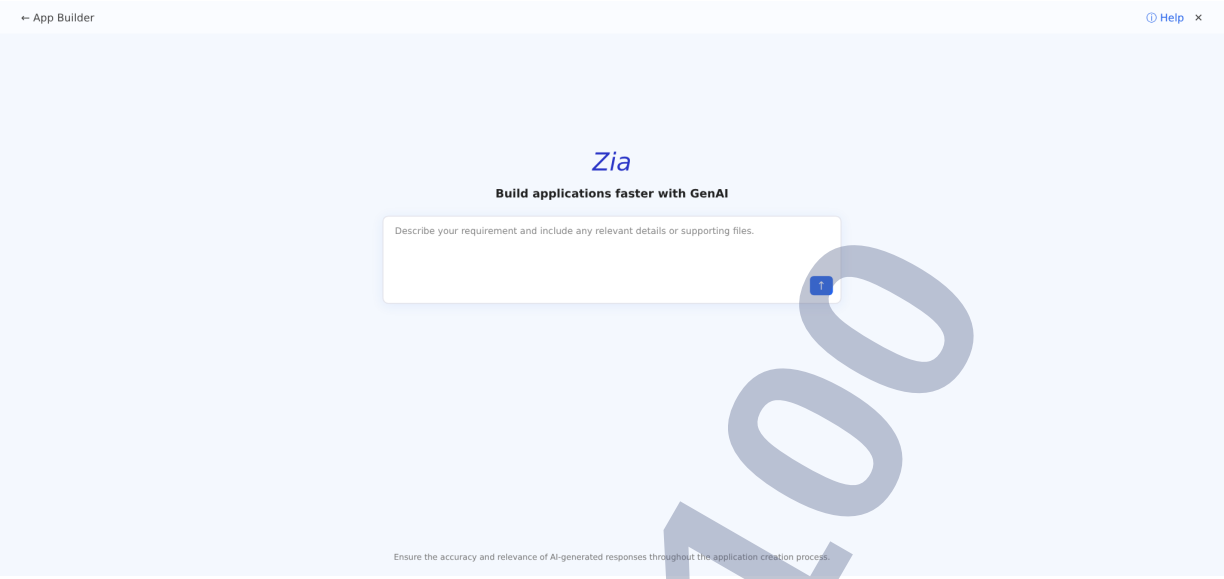

12.Create New Application Options

The “Create New Application” screen offers four options: build with Zia (AI), start from scratch, pick a ready-made app from the gallery, or import an existing file. It is flexible and suits both beginners and experienced developers.

2414011100

13.Gen AI App Builder Prompt Screen

The “App Builder” page introduces Zoho’s GenAI assistant and invites users to describe their app idea, for example a vehicle service and repair request system, so that AI can help build it. It is minimalistic and emphasizes ease and creativity.
